

Name

Smart Elevator Vending Machine

Model

SCVM10-1

Summary

The Smart Elevator Vending Machine is a premium solution for businesses expanding into modern, high-performance vending. Featuring a compact 32-inch HD touch display, it offers an intuitive way for customers to browse and select a wide range of products—from snacks to chilled beverages and more. With 50 adjustable slots and a high-capacity layout, it minimizes restocks while maximizing variety—ideal for stadiums, offices, retail spaces, and event venues.

An energy-efficient compressor and high-density insulation maintain consistent internal temperatures, while a smart thermostat ensures product freshness. The elevator system delivers each item smoothly in just 3 seconds, preventing drops or damage. With support for major payment methods—including Apple Pay, Google Pay, and contactless options—this machine is built for speed, security, and convenience. Constructed from durable steel and equipped with remote monitoring tools, it's built to perform—and built to scale.
