Key Features

1

High-Capacity Storage

Our ramen vending machines can hold up to 300 items across 60 adjustable slots, making it easy to stock different varieties of noodles, soups, or cup-based meals.

3

Interactive Touchscreen

The 21.5-inch touchscreen gives customers an easy way to browse, order, and pay, while also allowing for advertising or brand promotions.

5

Remote Cloud-Based Management

Monitor sales, stock, and system performance in real time across multiple units, whether you are managing a single ramen vending machine or an entire fleet.

2

Built-In Hot Water Dispenser

This machine comes with a dedicated hot water module, letting customers prepare ramen or cup-based meals instantly without needing any extra equipment.

4

Cashless & Mobile-First Payments

Accept Apple Pay, Google Pay, contactless cards, and more, delivering fast and secure transactions that modern customers expect.

6
