Key Features

1 Premium Brewing System

Built with a pressure valve brewing unit, it ensures full flavor extraction from the first drop—delivering café-quality espresso every time.

2 Compact, High-Capacity Design

Despite its countertop size, it serves up to 150 cups and holds multiple canisters for coffee beans, milk, and chocolate blends.

3 Touch Interface

A capacitive, illuminated keypad offers a smooth, user-friendly experience, perfect for office and public environments.

4 Fingerprint-Resistant Finish

Designed with easy-to-clean stainless steel panels and a tempered glass front for a modern, smudge-free appearance.

5 Fast, Consistent Service

Equipped with an aluminum boiler and dual mixers, it delivers hot drinks quickly and consistently, cup after cup.

6 Smart Payment Compatibility

Supports configurable payment systems, including card readers and coin options—fully MDB-compliant for modern setups.
